Kandangan Gg. II, Kec. Benowo, Surabaya, East Java

Information Systems undergraduate student seeking a full-time **internship opportunity** for the **January–June 2026 period** to support final year academic requirements. Possesses hands-on experience in developing simple CRUD-based web systems, managing operational data, and supporting internal workflows. Highly motivated to learn and contribute to internal business systems within an industrial and manufacturing environment.

EDUCATION

Institut Teknologi Sepuluh Nopember <i>Undergraduate in Information System, 3.44/4.00</i>	Surabaya, East Java August 2022 - June 2026 (<i>Expected</i>)
---	--

PROJECTS

NutriLink x HealthyGo — Nutrition Decision Support Android Mobile Application <i>Tech Stack: Flutter, Dart, Firebase (Auth, Firestore), Git, Gemini API</i> Developed a mobile-based nutrition decision support application featuring energy requirement calculations (Mifflin–St Jeor, TDEE), rule-based meal recommendations, and consumption tracking. Implemented backend services using Firebase to support authentication, real-time data synchronization, and profile management. The system was developed following formal software requirements (SRS Document) and tested to ensure calculation accuracy and reliability.	<i>Capstone Project</i> Sept – Dec 2025
SEKN — Web-Based Second-Hand Electronics Marketplace (Prototype) <i>Tech Stack: HTML, CSS, JavaScript (Vanilla), Browser APIs (Geolocation, localStorage)</i> Developed a web-based marketplace prototype for second-hand electronics, enabling product listing, specification-based search, and comparison by price and location. Implemented client-side data management using localStorage, price estimation logic based on depreciation rules, and location-based distance calculation using Geolocation APIs. The project emphasized fundamental web development and system workflow design without backend frameworks.	<i>Technopreneur</i> Nov - Dec 2025
Event Ticketing & Transaction Management System <i>Tech Stack: Google Spreadsheets, Google Apps Script (JavaScript), Excel, WhatsApp API</i> Designed and managed a ticketing and transaction management system for large-scale events, including seat availability control and sales tracking. Implemented automation using Google Apps Script to process form-based transactions, prevent double booking, and send real-time purchase confirmations via WhatsApp API. The system improved data accuracy and reduced manual operational coordination.	<i>ITS Student Choir</i> Aug - Nov 2025

WORK EXPERIENCES

Rumah Teror - Scoring Crew Managed and recorded visitor score data, including rating distribution and completion time tracking, to support performance evaluation and finalist selection, using Google Spreadsheet for structured data processing.	Mojokerto, East Java June - July 2023
Griya Pakan - Cashier Processed daily transactions using a POS system, handled customer inquiries, and ensured accurate product arrangement and checkout operations.	Mojokerto, East Java June - July 2022

LEADERSHIP & ACTIVITIES

ITS Student Choir <i>Leadership & Operational Roles</i> Progressed from operational roles to Chairman, leading organizational governance, ticketing systems, and external relations. Negotiated 25+ client engagements, developed an improved ticketing and seat management system, and led organizational reforms (TKO, AD/ART), resulting in multiple Gold awards, a 2nd Winner at regional competitions, and recognition as a top-performing student activity unit.	Surabaya, East Java Oct 2022 – Present
FORMITS (Forum Daerah Mahasiswa ITS – Mojokerto) <i>Leadership & Program Management Roles</i> Advanced from data management staff to Chairman, leading regional outreach programs that engaged 20+ schools, reached 500+ prospective students, and generated 250+ UTBK try-out registrants, contributing to FORMITS being nominated as an awardee at the ITS regional student forum.	Mojokerto, East Java Nov 2022 – Feb 2025
Information System Expo (ISE!) 2024 <i>Director of RISE!: Business Case Competition</i> Led end-to-end execution of a real-case business competition, managing cross-functional teams, stakeholder negotiations, and coordination with IT teams for competition administration systems, with 200+ registered participants in the preliminary round.	Surabaya, East Java May - Nov 2024
Gerigi ITS 2024 <i>Expert Staff, Data Center Division</i> Developed a rule-based student grouping system using Python to assign 360+ new students into orientation units under multiple constraints (gender balance, faculty distribution, capacity), supporting large-scale operational execution.	Surabaya, East Java June - Sept 2024
Himpunan Mahasiswa Sistem Informasi (HMSI) ITS <i>Student Welfare & Social Development Roles</i> Supported student welfare and academic coordination activities, including schedule assistance, communication with academic administration, and participation in community service initiatives.	Surabaya, East Java July 2023 - Feb 2025

TECHNICAL SKILLS

Programming & Scripting Python, JavaScript (Vanilla, Google Apps Script), Dart
Web & Mobile HTML5, CSS3, Flutter
Backend & Data Firebase (Auth, Firestore), Google Spreadsheets, Excel, localStorage
Automation & Integration Google Apps Script, API Integration (WhatsApp, Geolocation)
Tools & Systems Git/GitHub, Google Workspace, Power BI (exposure), CI/CD Azure (exposure), BPMN (academic)
